

SonicWALL Global Management System Entry Edition

The SonicWALL Global Management System Entry Edition (SonicWALL GMS) enables small organizations to manage SonicWALL Internet security appliances from a central location. SonicWALL GMS Entry Edition is a global management solution that reduces staffing requirements, speeds up deployment, and lowers the cost of managing security services.

SonicWALL GMS Entry Edition is a cost-effective, browser-based global management solution that provides the tools to easily configure and manage the security and VPN policies throughout the distributed organization. Administrators can configure SonicWALL firewall settings as well as SonicWALL upgrade and subscription services, such as VPN, network anti-virus and content filtering. Security policies can be centrally pushed to SonicWALL Internet security appliances on an individual, group, or global basis. SonicWALL GMS Entry Edition pushes security policies over encrypted VPN tunnels to ensure maximum security for deploying security policies and firmware updates.

With SonicWALL GMS Entry Edition, administrators can segment and distribute security management responsibilities among a group of individuals to enable flexible management across large distributed networks. SonicWALL GMS Entry Edition also supports an integrated database and offers optional reporting capabilities using integrated ViewPoint.

SonicWALL Global Management System Entry Edition provides a scalable, cost-effective security management system for SonicWALL Internet security appliances and services.

SonicWALL Global Management System

SonicWALL Global Management System Entry Edition Features and Benefits

SonicWALL GMS Entry Edition allows the administrator to easily create security policies for SonicWALL Internet security appliances and enforce them at the global, group or unit level.

SonicWALL GMS Entry Edition records all security policy updates and other administrator activities.

SonicWALL GMS Entry Edition with the ViewPoint upgrade allows administrators to generate a wide range of informative real time and historical reports to provide insight into usage trends and security events of the managed SonicWALL Internet security appliances.

- **Comprehensive Security Management.** SonicWALL GMS Entry Edition provides network administrators with configuration and management tools to globally define, distribute, enforce and deploy the full range of security services and upgrades for SonicWALL Internet security appliances.
- **Managed VPN Services.** SonicWALL GMS Entry Edition simplifies the task of globally defining, distributing, enforcing and deploying VPN policies for managed VPN gateways to keep all remote sites in synch with the latest security policies.
- **Low Total Cost of Ownership.** SonicWALL GMS Entry Edition extends the SonicWALL Internet security appliance's ease of installation and management, allowing small organizations to affordably manage the security policies of their networks. It reduces staffing requirements, speeds up deployment, and lowers the cost of delivering services by centralizing the management of security policies.
- **Streamlined License Management.** SonicWALL GMS Entry Edition allows central license management of the SonicWALL upgrade and subscription services. It simplifies the task of storing, applying, tracking and updating upgrade and subscription license information for all the managed SonicWALL Internet security appliances.
- **Multi-Tier Policy Hierarchy Architecture.** SonicWALL GMS Entry Edition allows administrators to easily set up a hierarchy to group SonicWALL Internet security appliances with similar security profiles to provide network administrators with the flexibility to manage the security policies on an individual, group and global level.
- **Distributed Security Management.** SonicWALL GMS Entry Edition allows administrators to segment and distribute management responsibility among a group of individuals. Responsibilities can be assigned with different privileges for managed SonicWALL Internet security appliances.
- **Customizable Viewing.** SonicWALL GMS Entry Edition allows the network administrators to visualize the managed SonicWALL Internet security appliances at any logical view. A view of a hierarchy of managed SonicWALL Internet security appliances can be created using pre-defined or custom attributes.
- **Optional ViewPoint Reporting.** SonicWALL GMS Entry Edition provides graphical reporting of firewall and network activities for the managed SonicWALL Internet security appliances. A wide range of informative real time and historical reports can be generated to provide insight into usage trends and security events of the managed SonicWALL Internet security appliances.
